

STATS 401 Lab 3 Exercises

Exercise 1: Create a new HTML file named “exercise1.html”, then create a web page from scratch that has:

- Title: List of My Favorite Things
- A Header that reads “Favorite Things”
- A Paragraph that describes the list.
- An Ordered list of at least three elements that contain your favorite things.
- A Button that says Confirm.

It should look like the following!

Exercise2: Link your CSS to the HTML file by finishing task 3 in the tutorial.

Exercise3: Create a new file named ‘exercise3.js’ and write code to achieve the following action:

Create an array with the following characters: “Mario”, “Rosalina”, “Luigi”, and “Bowser”. Next, the looping mechanisms we’ve learned (for or while loop) print out every character on a dialog box.

Please zip up the entire Lab 3 package and submit it to Sakai when you are done.
