STATS 401 Lab 9 Exercise

Create/search a meaningful dataset and visualize it in d3. There are no restrictions on the amount of the data items or attributes included in the dataset. You are allowed to choose the same design idioms as we have introduced in today's tutorial. **Please try to create at least 1 new feature from our tutorial in lab 9 or anything else, e.g., axis names, figure captions, mean value dotted line, text for marking the value of each data point, etc.**
